Agents for U.S.A.: The University of Chicago Press
Canada and India: Macmillan

CONTENTS

NO. 1 (FEBRUARY 1946)

	PAGE
1. The nature and distribution of various forms of nitrogen in the potato. By H. E. STREET, A. E. KENYON and G. M. WATSON. (With 7 Text-figures)	I
2. Some causes of chlorosis and necrosis of sugar-beet foliage. By J. B. HALE, M. A. WATSON and R. HULL. (With Plates 1 and 2 and 1 Text-figure)	13
3. Verticillium wilt of sainfoin. By IVOR ISAAC. (With Plate 3 and 3 Text-figures)	28
4. Eyespot of wheat and barley in Scotland in 1944. By MARY D. GLYNNE	35
5. The control of narcissus leaf diseases. III. <i>Sclerotinia polyblastis</i> Greg. on <i>Narcissus tazetta</i> var. Soleil d'Or. By P. H. GREGORY and GORDON W. GIBSON	40
6. Varietal differences in susceptibility to potato virus Y. By F. C. BAWDEN and S. KASSANIS	46
7. Resolution of strawberry virus complexes by means of the aphid vector <i>Capitophorus fragariae</i> Theob. By I. W. PRENTICE and R. V. HARRIS. (With Plate 4 and 1 Text-figure)	50
8. Field trials of copper fungicides for the control of potato blight. II. Spray retention. By E. C. LARGE, W. J. BEER and J. B. E. PATTERSON. (With 2 Text-figures)	54
9. The cereals root eelworm, <i>Heterodera major</i> (O. Schmidt) Franklin, in North Wales. By I. THOMAS, E. B. BROWN and R. J. WILLIS. (With Plate 5 and 1 Text-figure)	63
10. The shallot aphid, <i>Myzus ascalonicus</i> Doncaster, and its behaviour as a vector of plant viruses. By J. P. DONCASTER and B. KASSANIS. (With Plate 6)	66
11. Bionomics of the carrot fly (<i>Psila rosae</i> F.). I. The infestation and sampling of carrot crops. By D. W. WRIGHT and D. G. ASHBY. (With 8 Text-figures)	69
12. A study of the distribution of the swede midge (<i>Contarinia nasturtii</i> Kieffer) in Devon and the symptoms of its attack on various host plants. By D. C. THOMAS. (With Plate 7 and 2 Maps)	77
13. Tyroglyphid mites in stored products. Ecological studies. By M. E. SOLOMON. (With 4 Text-figures)	82
14. The toxicity of certain aliphatic chlorinated hydrocarbons to <i>Calandra granaria</i> L. and other insects infesting grain. By E. A. PARKIN. (With 1 Text-figure)	97
15. Toxicity to rainbow trout and minnows of some substances known to be present in waste water discharged to rivers. By J. GRINDLEY. (With 4 Text-figures)	103
16. A method of estimating the numbers of soil Protozoa, especially amoebae, based on their differential feeding on bacteria. By B. N. SINGH. (With Plate 8)	112
17. The recruitment and training of plant pathologists in Great Britain. A report prepared by the plant pests and diseases committee and adopted by the council of the Association of Applied Biologists	119

18. Proceedings of the Association of Applied Biologists: 5 October, 1945. Apple blossom weevil and its control by D.D.T. By G. H. L. DICKER. Experiments with D.D.T. smokes. By M. COHEN. The control of flies in farm buildings by D.D.T. By W. STEER and K. J. COGHILL. The control of sheep blowflies by D.D.T. dips. By J. B. CRAGG	124
--	-----

19. Reviews	129
-----------------------	-----

NO. 2 (MAY 1946)

1. The quantity and distribution of spray collected by insects flying through insecticidal mists. By W. A. L. DAVID. (With Plate 9 and 2 Text-figures)	133
2. Effects of atmospheric environment, before and after treatment, on the toxicity to insects of contact poisons. I. By C. POTTER and E. M. GILLHAM. (With 7 Text-figures)	142
3. The analysis of a factorial series of insecticide tests. By D. J. FINNEY	160
4. Note on the effect of wireworms of the genera <i>Agriotes</i> and <i>Corymbites</i> on crop yields. By L. BROADBENT. (With 2 Text-figures)	166
5. Simple laboratory and field apparatus for the production of accurate line drawings to scale. By L. N. STANILAND. (With 10 Text-figures)	170
6. A note on results from spectrographic analysis of coffee material. By C. A. THOROLD	177
7. The ecology of the larger fungi. V. An investigation into the influence of rainfall and temperature on the seasonal production of fungi in a beechwood and a pinewood. By W. H. WILKINS and G. C. M. HARRIS. (With 4 Text-figures)	179
8. Investigation into the production of bacteriostatic substances by fungi. Preliminary examination of more of the larger Basidiomycetes and some of the larger Ascomycetes. By W. H. WILKINS	188
9. The production of viridin by pigment-forming strains of <i>Trichoderma viride</i> . By P. W. BRIAN, P. J. CURTIS, H. G. HEMMING and J. C. MCGOWAN. (With 3 Text-figures)	190
10. Diseases of the gladiolus. III. <i>Botrytis</i> rot of corms and its control. By LILIAN E. HAWKER	200
11. Diseases of the gladiolus. IV. Note on the incidence and control of scab disease (<i>Bacterium marginatum</i> McCull). By LILIAN E. HAWKER	209
12. Further studies on the effect of disinfecting and bruising seed potatoes on the incidence of dry rot (<i>Fusarium caeruleum</i> (Lib.) Sacc.). By T. SMALL	211
13. Dry rot of potato (<i>Fusarium caeruleum</i> (Lib.) Sacc.). Effect of planting infected and contaminated sets on plant establishment. By T. SMALL	219
14. Proceedings of the Association of Applied Biologists: 9 November and 7 December 1945. Britain's seed supply problems in war-time. By L. E. COOK. Seedborne diseases. By W. C. MOORE	222

15. Proceedings of the Association of Applied Biologists: 22 February 1946. Past attempts to establish a scheme for the official approval of proprietary insecticides and fungicides. By HUBERT MARTIN. The structure and operation of the official approval scheme. By J. T. MARTIN. A manufacturer's comments on the approval scheme. By J. R. BOOER. The approval scheme as seen by a specialist advisory officer. By W. A. R. DILLON WESTON. The grower's impressions of the approval scheme. By O. G. DOREY	231
16. Report of the Council of the Association of Applied Biologists for the year 1945	245

No. 3 (AUGUST 1946)

1. PROFESSOR W. B. BRIERLEY. (With Frontispiece)	
2. Molybdenum as a factor in the nutrition of lettuce. By KATHERINE WARINGTON. (With Plate 10 and 2 Text-figures)	249
3. Observations on the effects of browning (<i>Polyspora Lini</i> Laff.) of flax on seed production. By JOHN COLHOUN	255
4. The relation between the contamination of flax seed with <i>Polyspora Lini</i> Laff. and <i>Colletotrichum linicola</i> Pethybr. & Laff. and the incidence of disease in the crop. By JOHN COLHOUN	260
5. Bionomics of the carrot fly (<i>Psila rosae</i> Fab.). II. Soil populations of carrot fly during autumn, winter and spring. By D. W. WRIGHT and D. G. ASHBY. (With 7 Text-figures)	263
6. The comparative toxicity of various contact insecticides to the louse (<i>Pediculus humanus</i> L.) and the bed-bug (<i>Cimex lectularius</i> L.). By J. R. BUSVINE	271
7. Tyroglyphid mites in stored products. Nature and amount of damage to wheat. By M. E. SOLOMON	280
8. Study of an infestation by <i>Laemophloeus</i> sp. (Coleoptera, Cucujidae) in bulk wheat. By C. E. LUCAS and T. A. OXLEY. (With 1 Text-figure)	289
9. On making measurements in silo-stored grain. By C. E. LUCAS and R. S. GLOVER. (With Plate 11 and 4 Text-figures)	293
10. The design and performance of an atomizing nozzle for use with a spraying tower for testing liquid insecticides. By P. S. HEWLETT. (With 2 Text-figures)	303
11. The provision of supplementary food to hive bees. By C. G. BUTLER	307
12. Further investigations on the value of electric heating of beehives. By C. G. BUTLER	310
13. The ecology and function of Protozoa in sewage purification. By A. NEVILLE BARKER. (With 3 Text-figures)	314
14. Proceedings of the Association of Applied Biologists: 12 April 1946. Symposium on problems associated with the growing and treatment of flax: Research in the flax industry. By G. O. SEARLE. Seedborne diseases of flax and their control. By A. E. MUSKETT and J. COLHOUN	326
15. Reviews	334

No. 4 (NOVEMBER 1946)

	PAGE
1. Studies on <i>Oscinella frit</i> Linn. Notes on the resistance of cereals to infestation. By N. CUNLIFFE and D. J. HODGES. (With 1 Text-figure)	339
2. A survey of potato aphides in north-west Derbyshire, 1945. By L. BROADBENT. (With 1 Text-figure)	360
3. The assimilation of ammonium and nitrate nitrogen by detached potato sprouts. By H. E. STREET, A. E. KENYON and G. M. WATSON. (With 10 Text-figures)	369
4. The formation of insecticidal films on building materials. I. Preliminary experiments with films of pyrethrum and D.D.T. in a heavy oil. By E. A. PARKIN and P. S. HEWLETT	381
5. A note on the efficiency of a pyrethrum spray in controlling <i>Ephestia elutella</i> Hb. moths in a granary. By R. W. OWEN and N. WALOFF	387
6. Experiments on the use of ethylene dibromide as a fumigant for grain and seed. By J. AMAN, L. FARKAS, M. PLAUT and M. H. BEN-SHAMAI	389
7. The use of toxic polynitro derivatives in pest control. III. The stability of dinitro-o-cresol in compounded products. By S. H. BENNETT, H. G. H. KEARNS, H. MARTIN and R. L. WAIN	396
8. Studies upon the copper fungicides. IX. Investigations with the exudate from fungus spores. By R. L. WAIN and E. H. WILKINSON	401
9. Field trials of copper fungicides for the control of potato blight. III. Low-copper fungicides. By E. C. LARGE and W. J. BEER. (With 1 Text-figure)	406
10. Further experiments on the control of white rot (<i>Sclerotium cepivorum</i> Berk.) in onions, shallots and leeks. By J. R. BOOER. (With 3 Text-figures)	413
11. Distribution of violet root rot (<i>Helicobasidium purpureum</i> Pat.) of sugar beet and preliminary experiments on factors affecting the disease. By R. HULL and A. R. WILSON. (With Plate 12)	420
12. The influence of potato variety on the cysts of the potato-root eelworm, <i>Heterodera rostochiensis</i> Wollenweber. By C. ELLENBY. (With 12 Text-figures)	433
13. A note on the relation of nematodes (<i>Tylenchus tritici</i>) to the development of the bacterial disease of wheat caused by <i>Bacterium tritici</i> . By C. C. CHEO. (With 4 Text-figures)	446
14. A mosaic disease of cowpea (<i>Vigna sinensis</i> Endl.). By T. F. YU. (With Plate 13)	450
15. LIST OF MEMBERS	455

INDEX OF AUTHORS

	PAGE		PAGE
AMAN, J., FARKAS, L., PLAUT, M. and BEN-SHAMAI, M. H. Experiments on the use of ethylene dibromide as a fumigant for grain and seed	389	CURTIS, P. J. <i>See</i> Brian, P. W. <i>et al.</i>	190
ASHBY, D. G. <i>See</i> Wright, D. W.	69	DAVID, W. A. L. The quantity and distribution of spray collected by insects flying through insecticidal mists. (With Plate 9 and 2 Text-figures)	133
— <i>See</i> Wright, D. W.	263	DICKER, G. H. L. Apple blossom weevil and its control by D.D.T.	124
BARKER, A. N. The ecology and function of Protozoa in sewage purification. (With 3 Text-figures) .	314	DONCASTER, J. P. and KASSANIS, B. The shallot aphid, <i>Myzus ascalonicus</i> Doncaster, and its behaviour as a vector of plant viruses	66
BAWDEN, F. C. and KASSANIS, B. Varietal differences in susceptibility to potato virus Y.	46	DOREY, O. G. The grower's impressions of the approval scheme for proprietary insecticides and fungicides	243
BEER, W. J. <i>See</i> Large, E. C. <i>et al.</i>	54	ELLENBY, C. The influence of potato variety on the cysts of the potato-root eelworm, <i>Heterodera rostochiensis</i> Wollenweber. (With 12 Text-figures)	433
— <i>See</i> Large, E. C. <i>et al.</i>	406	FARKAS, L. <i>See</i> Aman, J. <i>et al.</i>	389
BENNETT, S. H., KEARNS, H. G. H., MARTIN, H. and WAIN, R. L. The use of toxic polynitro derivatives in pest control. III. The stability of dinitro-o-cresol in compounded products . .	396	FINNEY, D. J. The analysis of a factorial series of insecticidal tests	160
